

603.02, Concrete Pipe

Qualification Requests

The information sent in with the request form must include the ACPA (American Concrete Pipe Association), NPCA (National Precast Concrete Association) and/or PCI (Prestressed Concrete Institute) certification and QC plan.

Qualification Requirements

The requirements for the plants that are applying for QPL prequalification are as follows.

- ❖ The producer will keep their ACPA, NPCA, and/or PCI certification up to date.
- ❖ All records at the plant will be kept up to date.
- ❖ MDT will perform plant inspections to check that all products are made to MDT specifications outlined in subsection 708.01 thru 708.04. The plant will be rejected if all of the requirements are not met.

Material Requirements

Requirements may be found in the Standard Specifications for Road and Bridge Construction subsection 603.02, 604, 708.01 thru 708.04, the Supplemental specifications to Montana Standard Specifications subsection 603.02, 604, 708.01 thru 708.04 or contract Special Provision.
